

VU Mechanik – LAWI 100515 (PI)

Date: 26.06.2026

The planar system consists of bending beams and a truss connected by hinges.

Tasks

- 1.** Determine the degree of static determinacy.
- 2.** Compute all support reactions and hinge forces.
- 3.** Determine all truss member forces (tension/compression).
- 4.** Draw the section forces N , V , M of the bending beams.
